Re: Chatswood Civic Place – Use of Dincol Wall

Willoughby City Council awarded A W Edwards the \$143m contract for design and construction of Chatswood Civic Place in July 2008.

The project consists of a 400 car underground carpark , Public Library, Civic Hall, 500 seat Theatre, 1000 seat Concert Hall, Retail Shops ,Cafes & Restaurants

An artist's impression of the new Chatswood Civic Place

Following on from the use of Dincol wall on a number of previous projects, Burak and his team have provided technical and practical assistance during design and construction of this project to ensure optimum outcomes have been achieved.

Dincol Wall has been incorporated into the project to replace portions of loading bearing concrete and masonry walls throughout the project including basement walls, stair shafts , lift shafts and curved walls.

We would welcome the opportunity to work with Dincol wall again in the future.

Yours faithfully
A W EDWARDS PTY LIMITED

7 Parkes Street
Parramatta NSW 2150

Attention: Mr Burak Dincel

Dear Burak,

RE: NORWEST PRIVATE HOSPITAL

The Dincel Construction System has been utilised on this project for a range of retaining walls, irrigation tanks, detention tanks and blade columns.

We have found the product to be cost-effective, versatile, practical and fit for its intended purpose.

Due to the advantages of utilising the Dincel product on the Norwest Private Hospital project at Bella Vista, we have recommended that the product be adopted for use on other A W Edwards projects. I understand that at least 3 other projects are currently utilising the product.

We would not hesitate to encourage the use of the product on future projects and will actively promote the product to Structural designers and Architects - as we have been able to realise several direct benefits as a result utilising the product to date.

We thank you for having introduced your product to A W Edwards during the early stages of the project and for the technical support provided during the design development stage. We also look forward to any further development of this highly innovative product.

Yours Faithfully,

A W EDWARDS PTY LIMITED

MICHAEL MUSARRA.
PROJECT MANAGER.
