

INSTALLERS

The installation of DINCEL CONSTRUCTION SYSTEM by the FORMWORKING Trades is recommended for obvious benefits for all parties involved.

The document **FORMWORKERS BENEFITS – download** highlights clear advantages of the formworking trades for the information of developers/builders.

Your formworker will be more receptive working with Dincel Construction System because it significantly improves the business of the Formworking Trades.

The following formworking trades agreed to install Dincel-Wall together with the associated and appropriate flooring system suitable to the formworking trade at a cost in the vicinity of **\$15/m² + GST** for the wall area being erected. This cost includes installation of Dincel-Forms including all necessary bracings, placement of concrete and reinforcement, for all building basement, lift, stair shafts, blade columns, party, corridor, façade walls. (Windows incorporating lintels made out of Dincel-Wall subject to additional charges. Nil charge for windows without lintels). Concrete, steel material supply, concrete pump cost not included in the above price (**download – COSTING CALCULATOR – ON FORMWORKERS' RATE**).

The above nominated rate can be negotiated with your installer if the project consists of only long straight walls such as basement and/or party walls because of their extremely simple installation methodology. The above nominated rate is subject to general site conditions, structural design and builders' requirements.
